

30-06 Springfield

with 165-grain DeepCurl® Soft Point

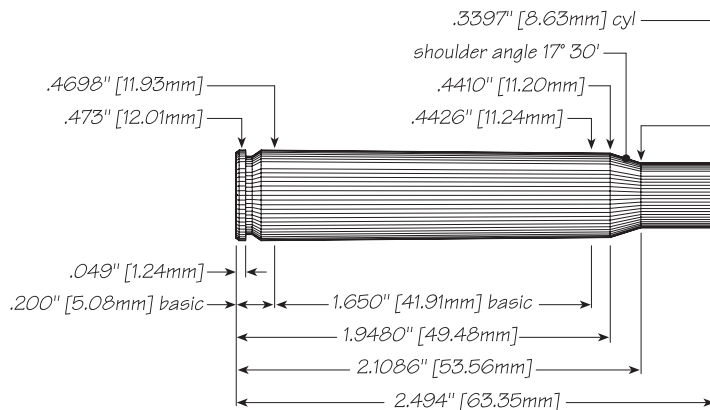

LABNOTES

With maximum charge velocities topping 2800 feet per second, the 165-grain Speer® DeepCurl® in 30-06 is ideally suited for the mid and long range shots common in the Western hunting grounds. DeepCurl's exceptional bonded construction drives superb penetration on game across a wide velocity range, appealing to the hunter who finds himself glassing distant hillsides in the morning and stalking through dense timber by afternoon. Handloaders who have grown weary of punishing recoil will also appreciate the starting charges for the 165-grain which still carry enough energy to produce fantastic expansions on large muleys at respectable distances.

0.308"	DeepCurl SP
Weight, grains	165
Ballistic Coefficient	0.441
Sectional Density	0.248
COAL Tested:	3.160"
